College Park designs and manufactures a full line of anatomically correct, custom built prosthetic solutions. College Park is ISO 13485 certified with an extensive focus on quality testing, and proudly sources and produces all products entirely in the USA. With precise engineering and quality manufacturing, College Park is committed to innovating human locomotion solutions for users all over the world.

The Tribute delivers dependable performance in a value package with a tri-axial design and Intelliweave® composite technology. This lightweight foot offers a full-length toe lever and low-frequency response, which allows for a full range of motion and firm footing on varying terrain. The Tribute is an ideal solution for initial fittings and low to moderate impact users.

EASY AS 1-2-3

Remove the 4 mm axial pin

Push the axial pin out with the Pin Guide...

Remove the ankle bone.

The Tribute comes with a toolbox of options to truly customize the foot. With one pin, assembly and disassembly couldn't be easier.

STRIDE CONTROL

Adjusting Stride Control up reduces heel resistance.

Adjusting Stride Control down will allow for a firmer heel response.

Adjust Stride Control with ease.

Stride Control is located in the back of the foot and allows for precise adjustment for a gait that is perfectly tuned to the user.

TRI-AXIAL TECHNOLOGY

True multi-axial movement occurs on all three planes. The Tribute provides anatomical plantar flexion, dorsiflexion, transverse rotation and inversion/eversion - allowing for ease of movement, excellent ground compliance, and comfort.

FULL RANGE OF MOTION

FOOT FLAT

On heel strike, the rear bumper compresses and pulls the toe downwards, giving longer ground contact.

TERMINAL STANCE

During stance phase, the front bumper starts to compress, rotating the ankle to ready the foot for a smooth toe-off, all without losing ground contact.
