

ENCORE V™

GEL LINER

- Continuous fit and comfort
- Anti-elongation fabric
- Innovative, high quality, durable

The Encore V Liner is designed for continuous fit and comfort. The difference is in the fabric. This liner is engineered with specially knitted anti-elongation fabric on the posterior side and distal end. The fabric is dynamically bonded with a high-cushion thermoplastic gel that is enriched with medical grade mineral oil. The result is a liner that provides continuous, durable comfort.

Thermoplastic Gel	Type	Color	Thickness	Size
Highly responsive	Locking Liner	Tan/Brown	3mm/3mm	16cm 24cm 34cm
Motion control	Cushion Liner	Steel Grey/Dark Grey	6mm/3mm	18cm 26cm 38cm
Designed for performance			9mm/3mm	20cm 28cm 42cm
			6mm/6mm	22cm 31cm
